MRN : 1494960 3.OP

F DOB : 10-Sep-2002

EP : SF081200 DOE: 06-Jun-2008

MRI BRAIN

06-Jun-2008
COLLEY, TAMSIN NOELLE 1494960

CLINICAL HISTORY:

Excision posterior fossa pilocytic astrocytoma 2004

TECHNIQUE:

Tumour brain protocol.

FINDINGS:

Findings compared to the previous study from 05/06/2006.
Postsurgical changes are again demonstrated in the posterior fossa.
There is postsurgical enlargement of the fourth ventricle and there is a moderately large subdural fluid collection in the right sided of the posterior fossa. There is no abnormal enhancement at the surgical bed.

IMPRESSION:

No radiological change when compared to previous study. No evidence of residual or recurrent tumour.
